

COVID-19 RAPID TEST KITS

SKU: CT

SARS-CoV-2 (COVID-19) IgM/IgG Antibody Fast Detection Kit

- Detects IgM and IgG antibodies simultaneously
 - IgM and IgG are the first antibodies appearing in the human immune system during infection. Because of their high specificity, when detecting acute SARS-CoV-2 infection, IgM and IgG antibodies have the advantages of high sensitivity, early diagnosis and the ability to judge if someone is infected.
- On site screening: Results can be read directly without equipment
- Simple sampling using fingertip and earlobe blood
- FAST SPEED: Process only takes 8 minutes. RESULTS in 3 minutes.
- Low Risk
